### **DETAILED ACTION**

The Election Requirement mailed 3/10/05 is withdrawn and replaced by the following:

#### ***Election/Restrictions***

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species A: A water heater and control method wherein the control is based on a ratio of maximum amount of fuel.

Species B: A water heater and control method wherein the control is based on providing bursts of fuel to the combustion chamber.

Species C: A water heater wherein a decreasing portion of fuel is supplied to the heating element as temperature approaches the set point.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. THERE IS NO GENERIC CLAIM.

In addition to the previous Election Requirement, since applicant elected Species A, an additional subspecies election will be required for the following:

Subspecies I: Gas water heater and method of controlling same.

Subspecies II: Electric water heater and method of controlling same.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3742

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thor S. Campbell whose telephone number is 571-272-4776. The examiner can normally be reached on Mon-Fri 5:30AM-2:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robin Evans can be reached on 571-272-4777. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
